PROFILE SUMMARY

2026 B.Tech Computer Science graduate with full-stack engineering experience spanning React.js frontends and FastAPI/PostgreSQL backends. Built 15+ reusable React components and end-to-end platforms handling 200+ records and 500+ concurrent users with real-time data sync. Comfortable working across the stack, from component architecture to REST API design and database optimization.

TECHNICAL SKILLS

Frontend: React.js, JavaScript, Material UI, HTML, CSS, Flutter

Backend: FastAPI, REST API Design, Service-Layer Architecture, JWT Authentication, RBAC

Databases: PostgreSQL, MongoDB, Firebase Realtime Database

Tools: Git, GitHub Actions (CI), Postman, API Testing

EXPERIENCE

Frontend Development Intern — Trios Technology, Chennai

Sep 2024 – Oct 2024

- Developed 15+ reusable React.js components, reducing code duplication by an estimated 30% and improving maintainability.
- Eliminated redundant re-renders through component and state refactoring, improving page load responsiveness.
- Managed Git/GitHub workflows including branching, merge conflict resolution, and collaborative feature development.

PROJECTS

Workforce Performance Tracker | React.js, Material UI, FastAPI, PostgreSQL

Jan 2026 – Mar 2026

- Built role-based React.js dashboards (Admin, Manager, Employee) integrated end-to-end with a FastAPI + PostgreSQL backend via REST APIs, managing state for real-time CRUD operations.
- Engineered 20+ backend RESTful endpoints with JWT Authentication and RBAC, powering the front-end dashboards with secure, multi-tier access control.
- Optimized the PostgreSQL schema with composite indexes and JOIN queries, delivering sub-200ms API responses across 200+ employee records consumed directly by the UI.

College Bus Live Tracking | Flutter, Firebase, Google Maps API

Oct 2025 – Dec 2025

- Built driver and passenger Flutter interfaces integrated with Google Maps API and custom overlays, serving 500+ students with live GPS visualization.
- Synced real-time location data via Firebase listeners streaming coordinates at 5-second intervals, ensuring low-latency updates in the UI.
- Implemented ETA prediction logic surfaced in-app using GPS coordinates and route-distance calculations, improving on-time arrival tracking.

TRAINING & PROFESSIONAL DEVELOPMENT

Revature — Full-Stack Development Training Program

Feb 2026 – Mar 2026

- Integrated React.js + Material UI frontends with FastAPI backends, delivering CRUD-enabled, role-based interfaces.
- Built a capstone project simulating Citi's client workshop use case, covering relational and document-based backends (PostgreSQL, MongoDB) end-to-end.

EDUCATION

B.Tech — Computer Science & Business Systems, Rajalakshmi Institute of Technology, Chennai Jun 2022 – May 2026
CGPA: 7.98 / 10

CERTIFICATIONS & ACHIEVEMENTS

- Oracle SQL — Great Learning (2023)
- Citi Group Full-Stack Development Workshop — Revature (2026)
- HCL Mainframe Workshop (2025)
